

NATURE'S SUPERHEROES:

# LIFE

STORIES OF AMAZING SPECIES

# AT THE LIMITS

Eye of Science / Science Source

Life is full of unexpected wonders. Over billions of years, living things have evolved from simple cells into an awe-inspiring array of life forms—a spectacle of colours, textures, behaviours, specialized parts and exacting skills. Some species are familiar. But others are so amazing that they test the limits of our imagination.

No matter how extraordinary certain plants and animals seem to us, their unusual features often address the most ordinary of tasks: To reproduce, breathe and move around. To sense the world. To find food and safety. The living things you will see respond to these basic challenges in extremely inventive ways. Join us this winter to experience Life at the Limits!

**January 27 - April 21, 2024**

**A perfect gift idea for the Holidays!**

Tickets available December 2023

Royal  
Botanical  
Gardens
